---

## ABOUT ME

---

I'm Senthilnathan from Theni. I completed my 12th in 2024 and am passionate about software development. I completed vocational training at Freshworks STS, learning frontend technologies. I built a flight ticket booking website using Firebase and improve my coding skills through JavaScript challenges. My goal is to build real-world projects and become a full-stack developer.

## PROJECTS

---

### Flight ticket booking app

A flight ticket booking app platform consists of a user-friendly frontend built with HTML, CSS, and JavaScript, allowing users to search for flights, enter details, and book seats. The backend, often using Firebase or other databases, manages user data, flight information, and bookings. [App Link Here.](#)

## MY PORTFOLIO

---

Discover my front-end development projects and design inspirations by visiting my portfolio. [Link Here.](#)

## SKILLS

---

Programming : HTML , CSS , JavaScript.

Tools : VS Code & GitHub.

Frameworks : Bootstrap.

Other : Responsive Design.
